SUMMARY

Product and business operations specialist with 4+ years of lending operations experience and a technical foundation (BCA + MBA in Analytics & Data Science + Project Management). Built the foundational lending data and ledger infrastructure at JD Finance, and architected 10 production systems across FinTech, EdTech, AgriTech, and Retail. Expert in diagnosing ground-level operational friction, modeling business workflows and financial ledgers, and translating specifications into robust system architectures, data schemas, and production-ready applications.

EXPERIENCE

Finance Operations Lead & Systems Builder

JD Finance | Surat, Gujarat

Aug 2021 – Jun 2024 (Full-time, On-site) | Apr 2025 – Present (Part-time, Hybrid) · 4 years 4 months

- Ran end-to-end lending operations across 4 years 4 months: borrower portfolio onboarding, credit validation, loan disbursement, and daily repayment tracking across 120+ active merchant accounts.
- Designed and built the firm's foundational Excel data and ledger infrastructure from scratch; remains the core operational system running daily operations today with 100% mathematical accuracy.
- Returned in 2025 to spearhead automation tooling, cutting daily accounting close time by 80%+ (from 90m to under 15m) with automated ledger reconciliation using Google Apps Script and streamlined data workflows.
- Formulated operational risk checks, delinquency alerts, and EMI schedules to ensure zero accounting discrepancies between field collections and ledger balances.

Skills: Process Automation, Business Operations, Amortization Modeling, Advanced Excel, Google Apps Script, Decision Analysis

Product Development Lead (Internship)

Work Sarthi | Surat, Gujarat

Jan 2026 – Mar 2026

- Worked directly under the Founder & CEO to conceptualize, coordinate, and deliver three digital products from scope definition to production release.
- Led the AI Career Assessment platform: engineered a psychometric scoring engine synthesizing RIASEC, Big Five, and Hofstede frameworks to generate comprehensive career reports in 13 Indian languages.
- Shipped Career Library, a 225-career interactive discovery portal for Class 11–12 students featuring AI-driven academic fit analysis from uploaded marksheets.

Skills: Product Coordination, PRD & Spec Writing, Google Apps Script, Multi-Language Localization, Systems Architecture

Product Developer – AI & Automation (Internship)

CripcoCode Technologies Pvt Ltd | Surat, Gujarat · Remote

Nov 2025 – Jan 2026

- Built and deployed Medicine Image Extraction: an AI computer vision pipeline converting pharmaceutical packaging photos into structured, verified database records.
- Replaced error-prone manual transcription for pharmacists and distributors, slashing cataloging turnaround time by over 80%.
- Architected the system into three decoupled micro-services, ensuring ingestion and local caching continue seamlessly even during database maintenance outages.

Skills: Gemini AI, AI Vision Automation, System Architecture, API Integration, Operational Continuity

SELECTED PROJECTS

Vyosha

FinTech / Lending, Live

vyosha.vercel.app | GitHub

Offline-first digital ledger & EMI prepayment platform for micro-merchants and kirana stores. Engineered passbook accounting with Frame-0 local caching, achieving sub-200ms cold-start hydration and offline transaction recording with zero cellular lag. Features exact banking amortization calculation parity, prepayment interest-savings simulation, dynamic NPCI UPI QR collection, and 98% client-side receipt photo compression.

Built with: React 19, TypeScript 5.8, Tailwind CSS v4, Firebase Firestore, IndexedDB Disk Cache, PWA

AspirantFlow

EdTech / Study Analytics, Live

aspirantflow.vercel.app | GitHub

Multi-exam syllabus tracker & study orchestrator across 101+ competitive exams and 15 domains (Banking, UPSC, SSC, RRB, Engineering, Medical, MBA, Placements). Engineered an offline-first PWA architecture (Service Worker v58, 220+ precached assets) with sub-16ms local persistence and 5000ms timeout-safe Firestore synchronization. Features cross-exam syllabus deduplication ("study once, benefit everywhere"), a generic dashboard controller powering 117 variant hubs, multi-horizon planning (ISO 8601), and zero-flicker pre-render layout guards (CLS 0.0).

Built with: Vanilla JS (ES6+), Vanilla CSS3 & Tailwind CSS, Firebase Auth & Firestore, Service Worker PWA (v58), LocalStorage API, Node.js Audit Suite

RAW

Android / HR Operations, Deployed at ARWS

GitHub

Enterprise background call-logging and workforce tracking automation app for high-volume recruitment teams. Captured and logged 100% of recruitment calls in real time, saving HR coordinators 30–60 minutes per day previously lost to manual spreadsheet data entry. Implemented dual-SIM hardware filtering (ensuring personal calls never leave the device), offline-first Room database queuing, and a 4-layer duplicate-prevention system with zero-cost Google Apps Script backend.

Built with: Kotlin, Room Database, Android WorkManager, Google Apps Script, Google Sheets API

SELECTED PROJECTS (CONTINUED)

FreshStamp

Retail / AI Vision, Live

fresh-stamp.vercel.app | GitHub

Computer-vision expiry tracking and inventory shrinkage prevention tool for retail shopkeepers. Uses Gemini Vision to parse manufacture dates, expiry dates, brand names, and price directly off product packaging in a single photo scan, eliminating manual catalog entry. Provides FIFO batch movement detection to prioritize stock clearance, financial waste analytics on expired inventory, and complete offline guest mode with cloud synchronization.

Built with: React, TypeScript, Firebase, Gemini Vision API, Tailwind CSS, Vercel Serverless

FinDhar

FinTech / Obligation Intelligence, Live

findhar.vercel.app | GitHub

Forward-looking committed cashflow & obligation intelligence engine projecting contractual burn across 12-to-60 month horizons. Inverts retrospective budgeting by modeling fixed, variable, and amortized liabilities (reducing bank loans, credit card EMIs, recurring mandates). Architected with deterministic month-end calendar clamping (eliminating cycle drift across 28- to 31-day months), optimistic state with a 10-second transactional undo buffer, exhaustive test validation, and air-gapped Gemini 2.0 Flash multimodal receipt OCR to safeguard financial data integrity.

Built with: React 19, TypeScript, Cloud Firestore, Workbox PWA, Gemini 2.0 Flash, Zustand, Zod, Vitest

SKILLS & COMPETENCIES

Product & Project Management: Product Roadmapping, PRD & Spec Writing, Requirements Gathering, Scope Definition, User Story Mapping, Stakeholder Communication, Delivery Ownership, Agile/Scrum

Business Operations & Finance: Lending Operations, Loan Amortization Modeling, Credit & Risk Validation, SOP Creation, Business Process Analysis, Accounting Parity, Collections Workflow

Data & Analytics: SQL, Python, Advanced Excel (Financial Models, Pivot, Dynamic Arrays), Power BI, Tableau, Performance Telemetry, Cohort Analysis, Reporting

Automation & Integrations: Google Apps Script, REST APIs, n8n, Make, Webhooks, Firestore Event Sync, SheetDB

Systems Orchestration & Applied AI: Systems Architecture, Structured Outputs, Multi-Provider Routing, Google Gemini, Claude API, Groq, NotebookLM

Systems Architecture & Technical Stacks: React, TypeScript, Node.js, Express, PostgreSQL, MongoDB, Firebase, Supabase, Kotlin (Android), Python (FastAPI), Tailwind CSS, Vite, Git, Vercel

EDUCATION

MBA – Analytics & Data Science + Project Management (Dual Specialization)

2026 – 2028

Manipal University Jaipur

BCA – Bachelor of Computer Applications

2023 – 2026

Bhagwan Mahavir University, Surat
